

## ENVIRONMENTAL PROTECTION POLICY

The environmental management of JSC “Almaty International Airport” is based on this policy.

JSC “Almaty International Airport acknowledges its obligation to preserve the environment, avoid pollution, and lessen the negative effects of its operations on the environment”.

The ability to set environmental goals, take action to accomplish those goals, and ensure ongoing improvement is provided by environmental protection policy.

**The main objectives of environmental protection are:**

- minimizing the degree of environmental harm.

**The fundamental guidelines for carrying out the Environmental Policy are:**

- compliance with the legislative requirements of the Republic of Kazakhstan, international and national standards, and internal documents of JSC “Almaty International Airport”, regulating the activities of the enterprise in the field of environmental protection;
- adopting a strategy based on the recognition, evaluation, and control of environmental features and associated environmental impacts;
- conducting internal audits to ensure adherence to environmental laws;
- implementation of continuous industrial environmental monitoring on the territory of the enterprise;
- implementation of separate collection of production and consumption waste in order to optimize further methods of waste disposal and utilization through contracts with specialized organizations;
- regular evaluation of the operation and performance of the environmental management system in order to assess the level of achievement and spot areas for ongoing improvement;
- ensuring transparency and awareness to shareholders, partners, employees, government agencies, the public and other interested parties about the aspects of the company's activities in the field of environmental protection, the reliability of information, its content and efficiency;
- improving the employees' awareness of environmental preservation, consciousness of it, and sense of responsibility;
- responsibility of contractors for compliance with environmental protection requirements.

Aviation security and flight safety, airfield operations, terminal operations, ground handling, and cargo handling in the warehouse are all included in the environmental management system's scope.

This policy applies to the business activities, services, and facilities directly under the control of JSC Almaty International Airport.

This policy shall apply to all employees, consultants, and subcontractors of JSC “Almaty International Airport”, as well as to other businesses carrying out activities at the airport.
